

RealDolmen and Trapeze, a strong Wireless team

RealDolmen NV and Trapeze Networks NV have decided to join hands to supply their customers with wireless network solutions. The many years of project experience of RealDolmen in combination with the proven advanced technology of Trapeze must result in reliable, secure, high performance and scalable WLAN architectures.

With Trapeze Networks NV, RealDolmen adds another focused wireless partner to its list of networking partners that already include prominent parties such as Cisco and HP Procurve. Trapeze Networks, a Bells brand, is a leading supplier of wireless equipment and management software for business networks. Trapeze was the first company to introduce NonStop Wireless, to optimize the reliability of wireless networks and the applications that run on them. Initially, especially organizations with many mobile workers and broadband applications in the medical, the education and the hospitality sectors chose for Trapeze. Meanwhile, Trapeze has also several important references in the financial market, because of its unique security qualities. Trapeze supplies Smart Mobile scalable wireless networks for applications such as Voice over Wi-Fi, location services and indoors/outdoors connectivity.

The choice to partner with Trapeze is a logical consequence of on the one hand our search for a 'best-of-breed' player in WLAN technology, and on the other hand a successful implementation of a Trapeze WLAN infrastructure project for the city of Kortrijk.

Both parties shall address customers during a special RealDolmen update session in April. More info about this event shall be published shortly on the Events page of the RealDolmen website: www.realdolmen.com.

About RealDolmen

RealDolmen is an independent single source ICT solutions provider and knowledge company with over 1900 highly skilled IT professionals and more than 1000 customers in the Benelux and France. The company offers innovative, effective and reliable ICT solutions and professional services designed to help its clients achieve their objectives by optimizing their business processes.

About Trapeze

Trapeze Networks, a Belden Brand, is a leader in enterprise wireless LAN equipment and management software. Trapeze was the first company to introduce NonStop Wireless - delivering unmatched reliability to the enterprise wireless LAN, and its solutions are optimized for companies requiring mobility and high bandwidth such as healthcare, education, and hospitality. Trapeze delivers Smart Mobile™ providing scalable wireless LANs for applications such as Voice over Wi-Fi, location services, and indoor/outdoor connectivity.
