A trend towards destructive attacks

2017 IN REVIEW ATTACKS ACCELERATING

MORE COMMON

Cyber-attack volume **doubled** in first half of 2017 (compared to 2016)
InfoSecurity, F-Secure Labs, 2017

MORE COSTLY

The global cost of cybercrime has rocketed by **23%** over the past year to reach **\$11.7m** per business
Ponemon Institute, 2017 Cost of Cyber Crime Study, 2017

MORE UNPREDICTABLE

In the first quarter of 2017, **new malware** emerged every **4.2 seconds**
GData, Malware Trends 2017, 2017

EVERY PC DECISION
IS A SECURITY DECISION.

Are you concerned
about printer security?
You should be.

Today's printers look a whole lot like PCs

Hardware

Firmware and software

Internet

Email

Network access

And yet, printing is not a high security priority for ITDMs

Level of concern

91%
PC devices

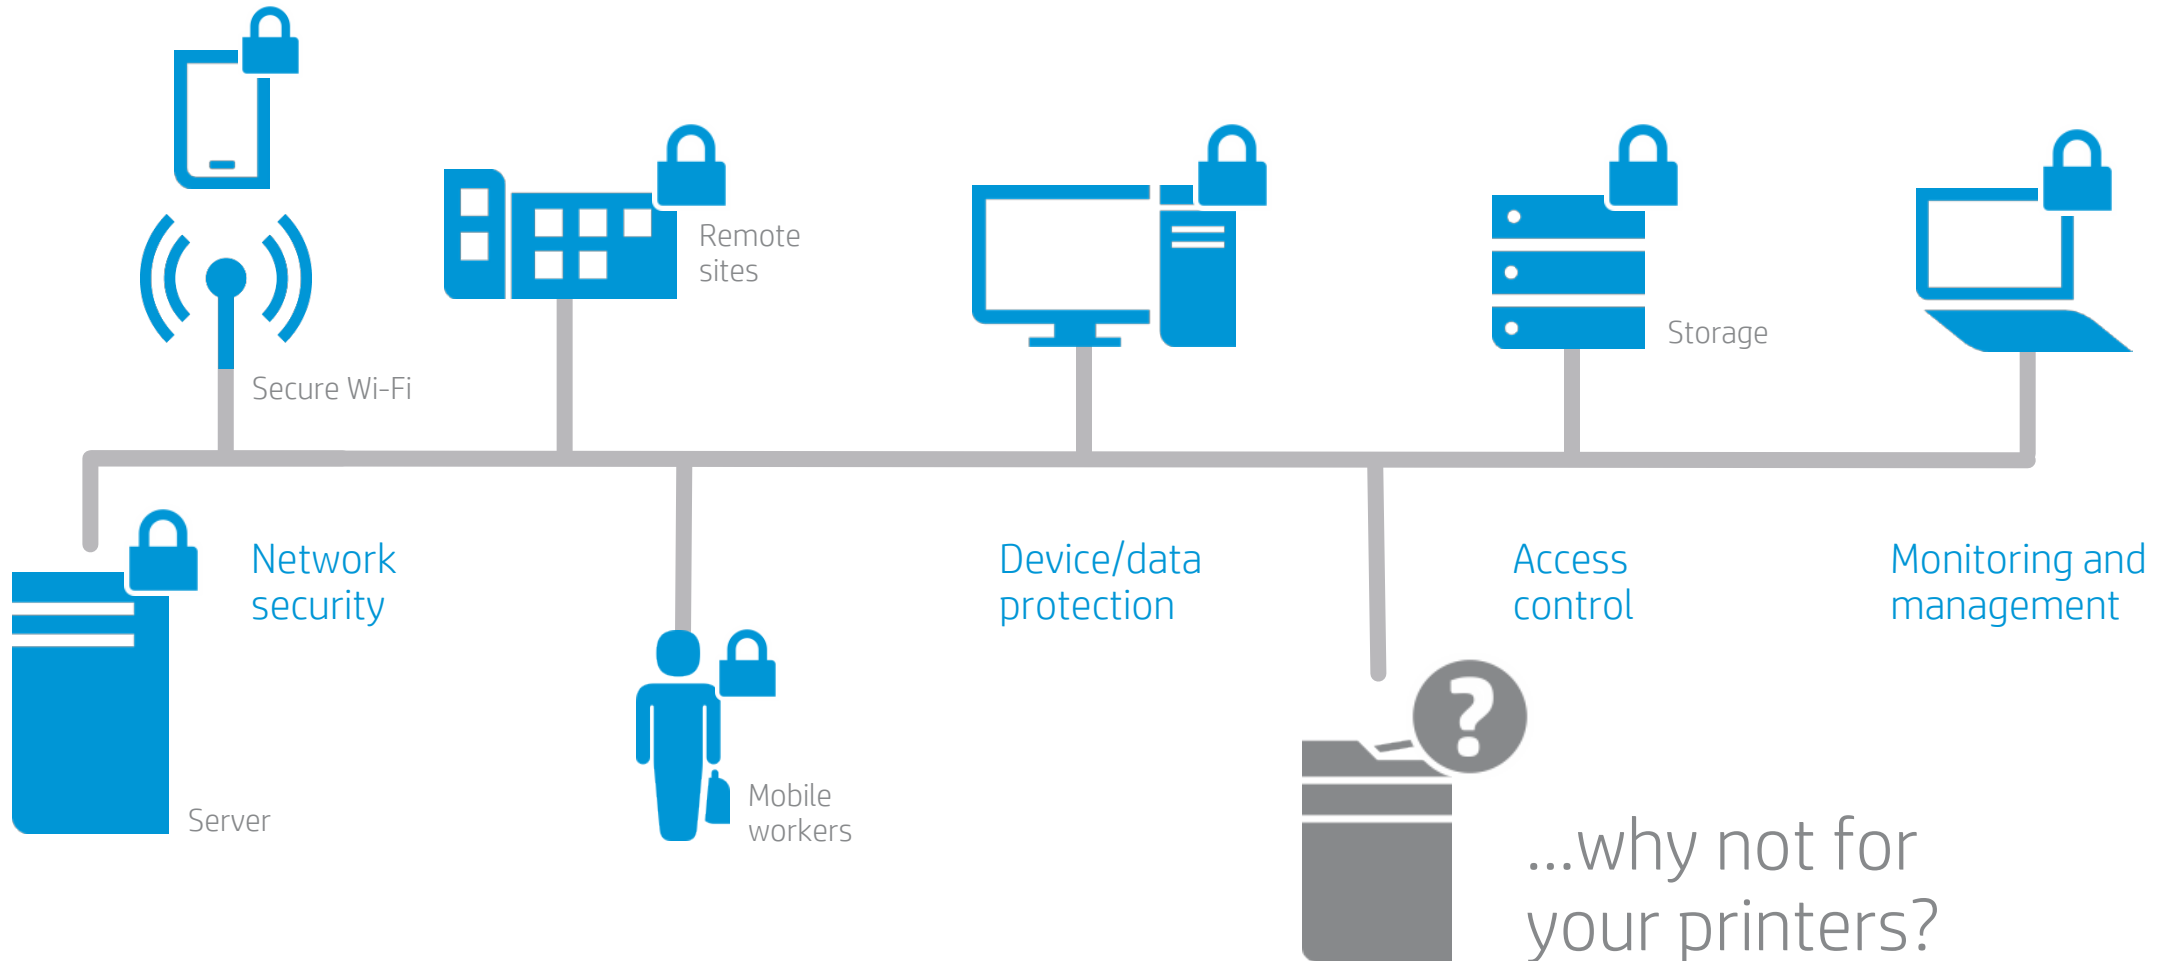

77%
mobile
devices

18%
printers

77%
servers

You invest in security measures for your computing devices...

Every endpoint should be an equal citizen on the network

Endpoint devices as the first line of defence

Choosing a device
is already a
security decision

Device Security Starts with the BIOS

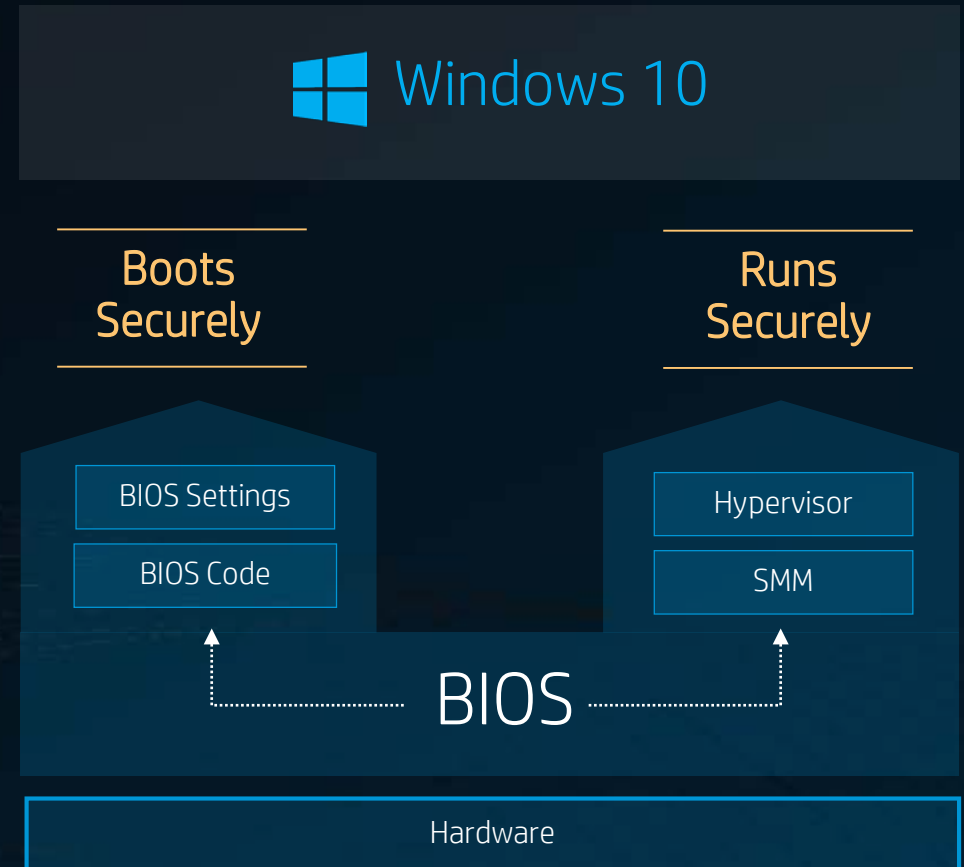

What is the BIOS:

BIOS is the first million lines of code that run. It is the key to your PC's foundation.

Why should customers care?

Once the BIOS is corrupted, the **hackers "own" your PC**: all other protection is **useless**.

No antivirus or OS firewall can detect an infected BIOS!

HP's Legacy of BIOS Security Leadership

Since 2014 HP Sure Start has been enabled by a unique hardware element – the HP Endpoint Security Controller.

2005 – Cryptographically secure BIOS updates

2011 - Leadership with BIOS security standards (NIST 800-147, ISO 19678)

2014 - HP BIOSphere with Sure Start (Gen1)

2015 – HP Sure Start with Dynamic Protection (Gen2)

2017 – HP Sure Start with Runtime Intrusion Detection (Gen3)

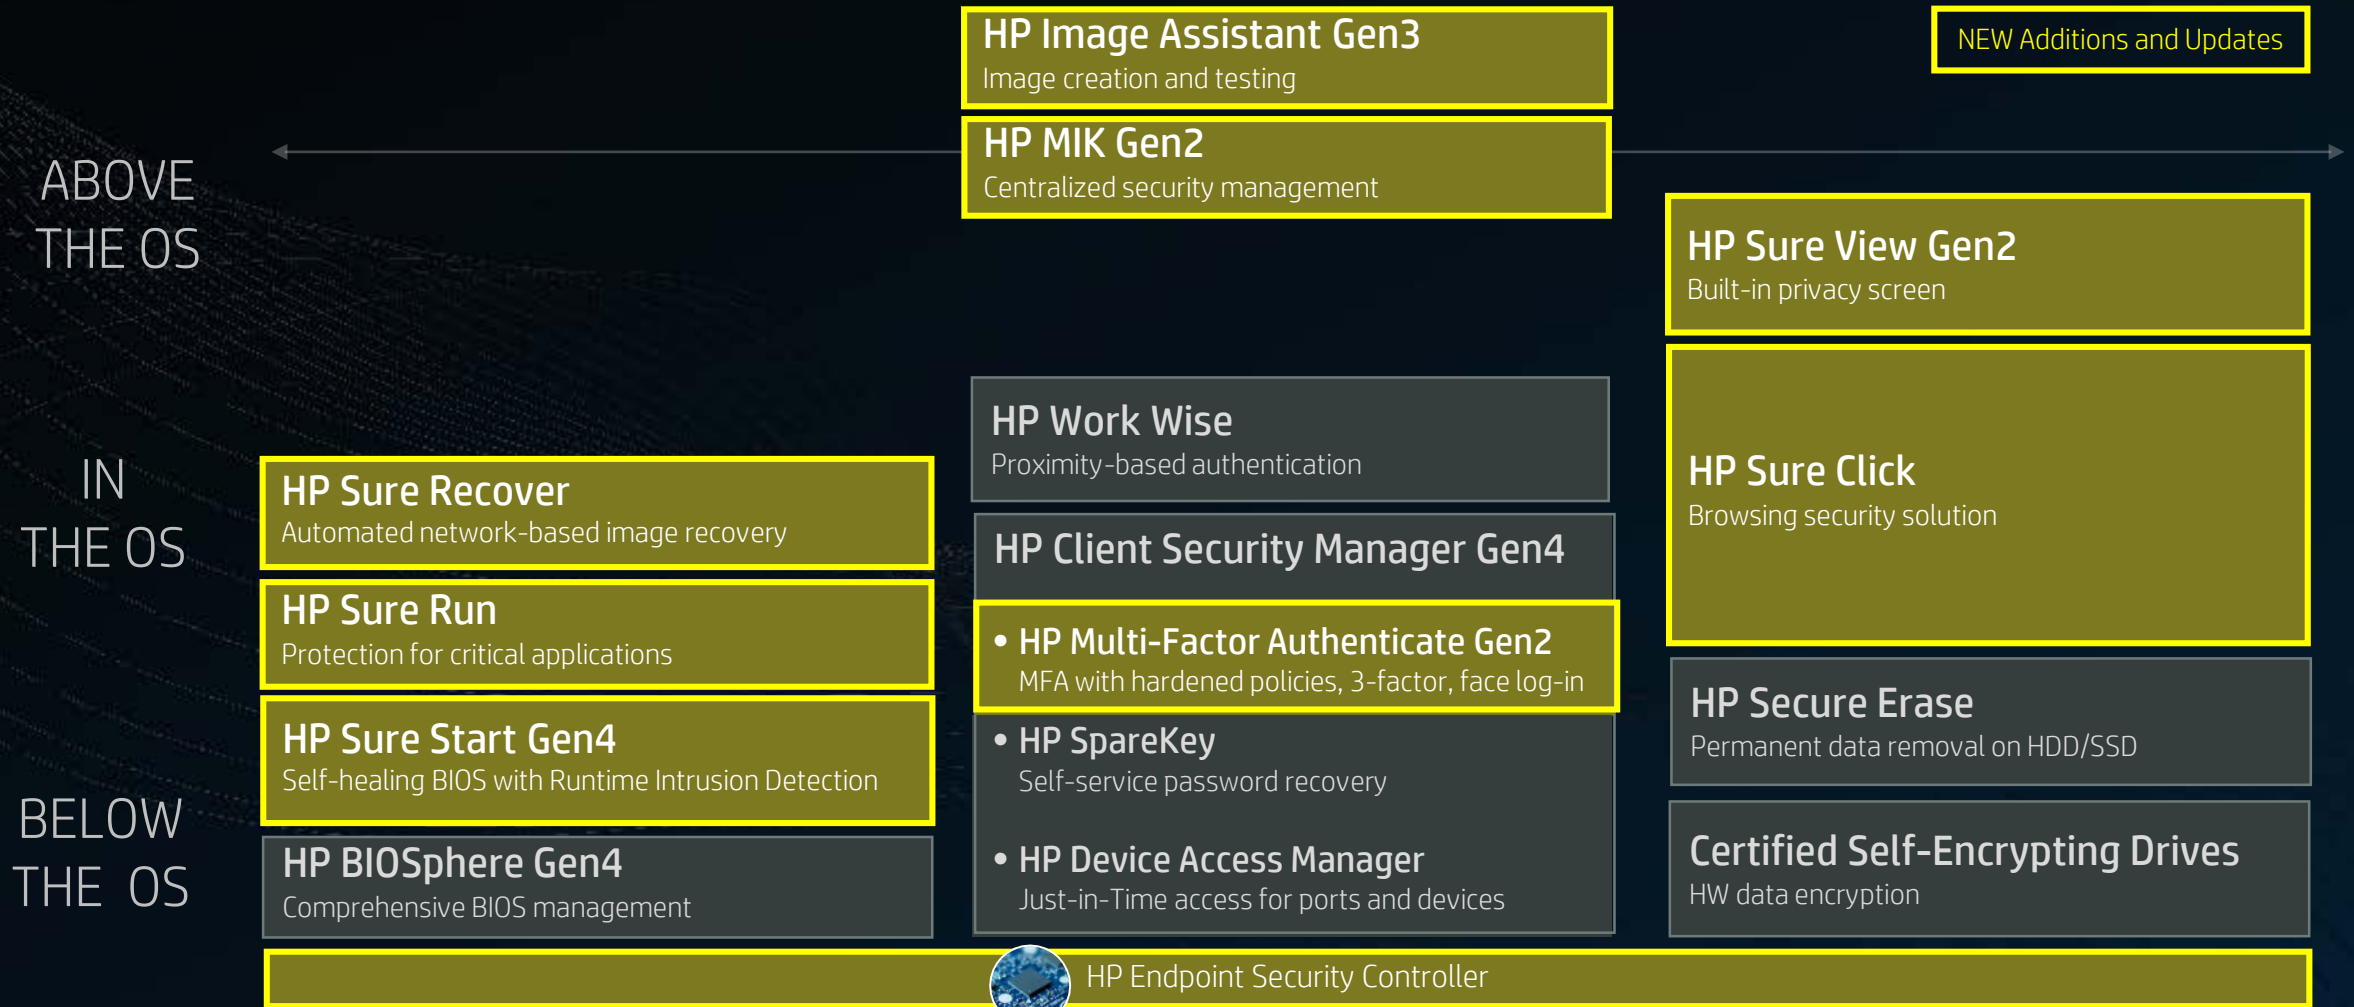

2018 - HP Sure Start Gen4 goes beyond the BIOS with enhanced security and resiliency

IN 2018, HP'S SECURITY STACK GETS A MASSIVE UPGRADE

BELOW
THE OS

Common imaging and printing vulnerability points

BIOS and firmware

Compromised firmware can open a device and network to attack

Management

Undetected security gaps put data at risk

Network

Jobs can be intercepted as they travel to/from a device

Control panel

Users can exploit device settings and functions

Ports and protocols

Unsecured ports (USB or network) or protocols (FTP or Telnet) put device at risk

Storage media

Printers store sensitive information that can be at risk

Capture

Unsecured MFPs can be used to send scans anywhere

Input tray

Special media can be tampered with or stolen

Output tray

Abandoned documents can fall into the wrong hands

Mobile printing

On-the-go employees may expose data

WORK FREELY IN PUBLIC SPACES

HP Sure View Gen2: the world's **ONLY** integrated PC privacy screen

Privacy at the
push of a button

HP Sure View Gen2 protects against visual hacking with the press of a button.

Now in its SECOND GENERATION, HP Sure View Gen2 enables a **better visual experience** in light OR dark environments – from the plane to the café

What's New

- Performs great in BRIGHT and **DARK** environments
- **IPS** panel technology
- Improved **120Hz REFRESH RATE**, for smooth motion
- Reduced display thickness - **ULTRA-THIN DESIGNS**

Secure Device – Secure Data – Secure Document

Secure the DEVICE

Real-time threat detection, automated monitoring, and built-in software validation

Complete the check cycle

HP JetAdvantage Security Manager

Automatically validates security settings across the fleet, which helps you comply with configuration policies

Protect the network

HP Connection Inspector

Inspects outgoing network connections to stop suspicious requests and thwart malware.

Protect memory

Run-time intrusion detection

During run-time, HP devices detect and prevent unexpected memory changes

Validate BIOS integrity

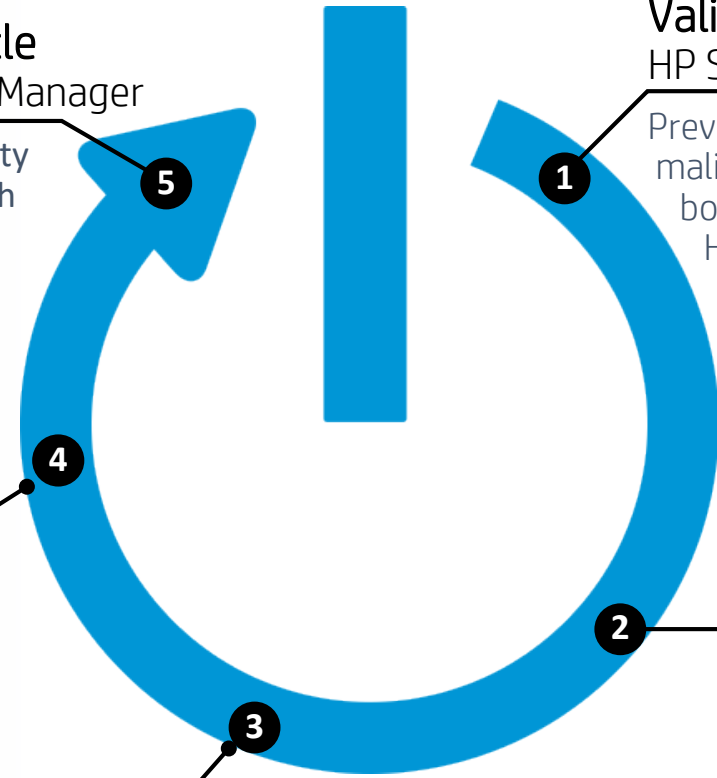

HP Sure Start

Prevents the execution of malicious code during bootup by ensuring only HP-signed, genuine code is loaded

Validate firmware

HP Whitelisting

Helps ensure only authentic, known-good HP firmware is loaded into memory

Secure the DATA

Keep sensitive information secure—
in transit and at rest—with
encryption

Protect

Data with 802.1x or IPsec network standards

Data in transit with print job encryption and secure capture and route solutions

Data at rest with built-in encryption to secure data on the printer hard disk; add the HP TPM accessory to strengthen protection

The network with firewall settings and digital certificates

Devices, functions, and data with authentication solutions and role-based controls that prevent unauthorized access

Your environment with data tracking reporting solutions

Secure the DOCUMENT

Users authenticate at their preferred printer to pull and print jobs

- Keep confidential documents from falling into the wrong hands
- Reduce unclaimed print jobs
- Send scanned documents in a secure way
- Facilitate access to devices for mobile workers
- Support a wide variety of authentication methods, including mobile release

Enforce your company's security policies with **HP Manageability Integration Kit Gen2**⁶

HP Manageability Integration Kit is
the first and only Microsoft certified plug in for SCCM
now in its second generation.

NOW YOU CAN MANAGE **MORE** HP SECURITY, **MORE** HP FEATURES

Manage **new!** HP Security features

- HP Sure Run³
- HP Sure Recover⁴

Manage policies for 3 factors or
VPN credentials in **HP Multi-
Factor Authenticate**⁵

Set policies for **HP Sure View**⁷
and additional HP Software

New UI makes it even easier for
ITDMs to create and manage
policies

IMPROVE YOUR IMAGE

Build better software images in minutes with **HP Image Assistant**

Image Assistant will report:

- Security issues
- Driver issues
- BIOS settings

Can install missing or outdated components

Essential for Win 10 transition

An essential, free **IT Admin tool** to develop, maintain, and support software images for optimal Windows performance.

- Compare HP factory image to corporate image to uncover latest drivers, BIOS updates, updated components, and more

New for 2018!

- Image Assistant now supports HP **Thunderbolt dock firmware**
- Now with quick access to **Product Change Notifications** and **Customer Advisories**

Fleet Solutions & Tools

HP JetAdvantage Security Manager

The industry's only policy-based print security compliance tool

Increase security across your fleet

Strengthen compliance to corporate security policies

Reduce risk of costly security breaches

HP JetAdvantage Security Manager

Integrated security and workflow solutions

Print management solutions help secure and optimize your printing investment across the organization

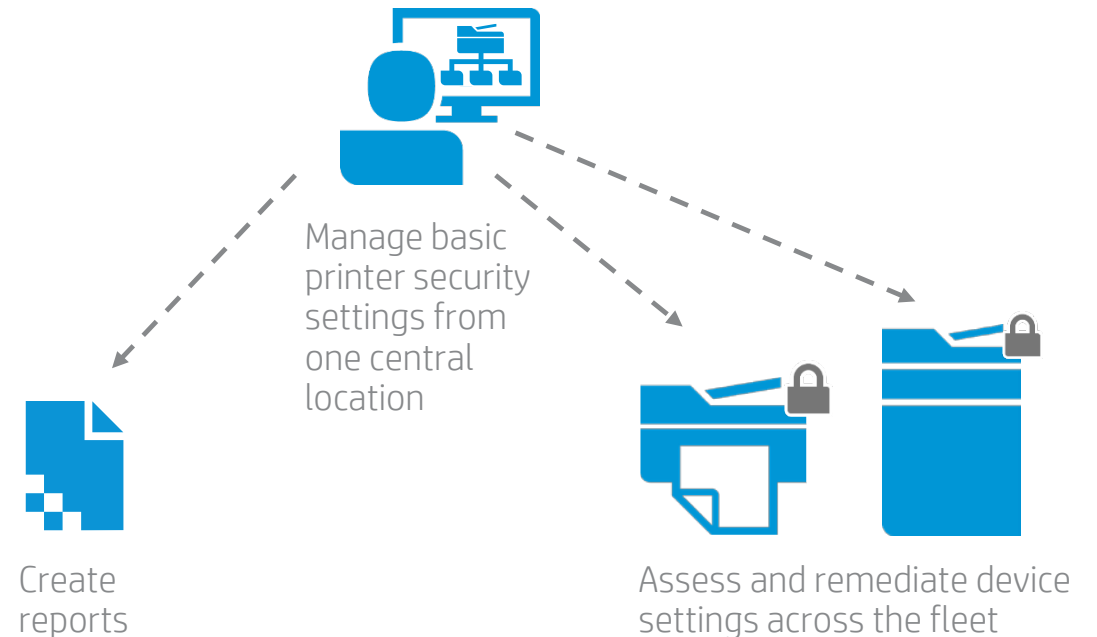

HP Print Manageability Integration Kit for Microsoft SCCM

Manage basic (top 15) printer security settings across the fleet

HP Print Manageability Integration Kit is a plug-in for Microsoft® System Center Configuration Manager (SCCM) that allows you to:

- Discover and group devices
- Assess and remediate the top 15 configurations like Admin Password
- Increase security by disabling unused, unsecure protocols; turning off obscure file system access; and more
- Create reports, from executive level to detailed device level

EVERY PRINTER DECISION IS A SECURITY DECISION

HP makes the world's most secure and manageable Printers

- **Identify vulnerabilities** in your environment with assessment tools
- **Upgrade to the world's most secure printing:** HP Enterprise printers and MFPs
- **Improve print fleet security management**
- **Deploy HP JetAdvantage Security Manager** for automated assessment and remediation of print security policies
- **Plug the HP Manageability Integration Kit into Microsoft® SCCM** for comprehensive manageability of HP PC fleet security features
- **Implement Print Management Solutions** to support authentication, add encryption to the print stream, protect documents with pull printing, and more

EVERY PC DECISION IS A SECURITY DECISION

HP makes the world's most secure and manageable PCs

- **Anchor your security in hardware.** HP Endpoint Security Controller extends hardened security beyond the BIOS
- **Don't become the next headline.** Defend against devastating firmware attacks with HP Sure Start Gen4²
- **Make sure attackers can't turn off your antivirus.** Protect critical security processes with HP Sure Run³
- **Don't let an attack impact your bottom line.** Recover quickly and minimize downtime with HP Sure Recover⁴
- **Keep web-borne malware from breaking in.** Browse the web and view files without hesitation with HP Sure Click⁸
- **Stop looking over your shoulder.** HP Sure View Gen2⁷ deters visual hacking in public spaces
- **Help ensure every PC stays protected.** Enforce your company's security policies with HP Manageability Integration Kit Gen2⁶
