Microsoft 365 is **challenging** out of the box

Orchestry

For too long, Microsoft 365 administrators have grappled with the complexities of managing, governing, and securing their environments. Without a unified solution, they've been left in the dark, relying on scattered reports and guesswork.

The result? Uncertainty about what needs to be done and when. **It's time for a change.**

INTRODUCING

Orchestry Recommendations

Orchestry Recommendations is your beacon of clarity in the complex world of Microsoft 365, guiding your decision-making like a team of experts and anticipating challenges before they arise.

The screenshot displays the Orchestry Recommendations interface. On the left is a navigation sidebar with categories like Home, Signals, Recommendations, Health Checks, Provision, Template, Analyze, and Automate. The main content area shows a 'Signals Recommendations' section with filters for 'Open' (5), 'Resolved' (4), and 'Snoozed' (2). A search bar and 'Filters' dropdown are also present. Below this, a summary shows 'Total Workspaces Scanned: 1,345'. There are three summary cards: 'Priority' (Urgent: 1, Important: 3, Best Practice: 1), 'Resolved' (8, Last 30 Days ↑ 23%), and 'New' (12, Last 30 Days). A 'Top Categories' table lists: Security (25), Adoption (17), Guests (6), Architecture (22), Cost Saving (14), and Communications (-). Three recommendation cards are shown: 'Large Audience for Shared Links in OneDrive' (Important), 'Workspaces Without Guest Review Policies' (Urgent), and 'Unusual OneDrive Deletion Activity' (Important). Callouts highlight 'AI Readiness' and 'Security'. The Orchestry logo is in the top right, and Microsoft 365 icons are in the bottom right.

Governance

Unlock the full power of Microsoft 365 with Orchestry

- ✓ Trusted by thousands of IT admins, and partners
- ✓ Fully secure application, SOC2 Security compliant

How do Orchestry Recommendations work?

Orchestry Recommendations is a data-driven solution that provides instant insights into your M365 environment. It focuses on:

 AI Readiness

 Management

 Governance

 Adoption

 Security

Orchestry gathers historical and current data from various Microsoft 365 APIs and instantly produces intelligent recommendations:

Orchestry Recommendations

Microsoft Teams

Channel info, App usage, and interactions

SharePoint

Lists, Libraries, Pages, Hub Site Configuration, and more

M365 Reports

Historical usage data for Exchange, OneDrive, and apps

M365 Audit Logs

Events related to link sharing, permissions, and more

Licensing Info

License availability, assignments, and redundancies

Guest Info

Access, creation, status, and permissions

Address issues proactively, implement best practices and future-proof your environment.

Proactive Precision

Orchestry Recommendations provides dynamic insights, sparing you from tedious data analysis. With the ability to analyze historical data and trends, it proactively identifies issues **BEFORE** they impact your M365 environment, letting you invest your time where it matters most.

 Urgent

Tenant Near Storage Quota

Your recent growth of **10 TB per month** will exceed your Tenant Quota within **3 months**

 Cost Savings  Storage 

 Urgent

Workspaces with Sensitivity Label Changes

You have **39 workspaces** whose Sensitivity Label has been changed in the last 7 days

 Security  Governance 

Tailored Just for You

Your environment is unique, and so are its challenges. Orchestry's intelligent adaptive triggers deliver personalized recommendations, cutting through the noise to address your specific needs.

Prepare for the Future

Get ahead with Orchestry for Microsoft Copilot readiness. Tackle sprawl, prevent oversharing, and fortify your environment, ensuring you're poised to unlock the potential of this groundbreaking technology.

 Important

Workspace Oversharing Detected

You have **227 Workspaces** that have overshared content

STEP 3

Take action to resolve

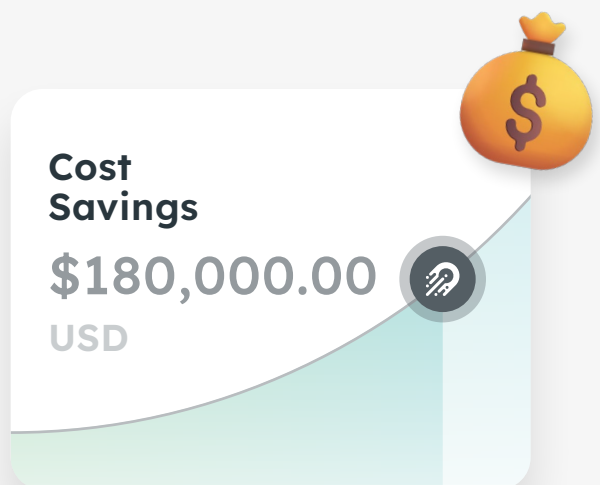

Intelligent recommendations beyond standard Microsoft 365 capabilities.

Functionality		
Centralized Insights and Recommendations across Microsoft 365		Not Available
Data driven best practice suggestions specific to your tenant		Not Available
Proactive & predictive recommendations based on usage patterns and trends		Not Available
Single consolidated list of recommendations for multiple M365 workloads including Entra ID, SharePoint, Teams, Defender and others		Not Available
Constantly evolving recommendations based on data and Microsoft 365 expertise		Not Available
Copilot readiness recommendations to help organizations get ready for AI in Microsoft 365		Not Available

A successful Copilot rollout relies on your tenant's readiness for AI.

To deploy Copilot, you need either SharePoint Premium licenses for all M365 users in your organization, or a third-party tool like Orchestray.

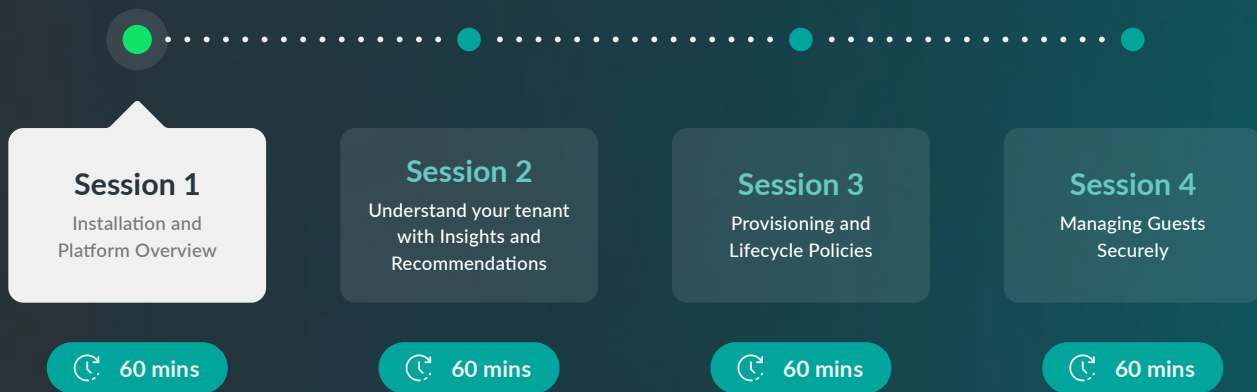

SharePoint Premium for 5000 users will cost USD\$180,000. Orchestray offers superior performance and functionality at a fraction of the cost, saving you over USD\$130,000 annually.

See Orchestry in action

Orchestry offers a 28-day managed evaluation. Our managed evaluation allows you to see the power of Orchestry in your environment. It's a risk-free yet real-world experience led by a member of our Success Team.

These sessions will provide insights, instructions, and guidance while allowing members of your team to be in the driver's seat throughout the sessions to explore the platform and gain firsthand experience.
