

# Commvault – out of the box (of backup)

Peter Maes – SE BeLux

#### **Commvault and Realdolmen**

Long-term partnership since 2015

Realdolmen/Gfi is the only Market Builder partner for Commvault in Belgium:

- Highest number of certified people
- Highest tier of certification

#### We have 2 frame agreements together:

- SMALS
- Stad Brugge

#### CASP partner

• Provide 1<sup>st</sup> line support

Active together in R-cloud

## MARKETBUILDER

## Commvault – What you know

Top rated backup and recovery solution:

- One of the most trusted names in backup and recovery
- "Single pane of glass" for all data under protection
- Simplified pricing and packaging
- Almost any source:

COMMVAULT 🚯

- Physical, virtual, cloud, and hybrid
- Databases, applications, file systems, and more
- Endpoints, mailboxes, SaaS applications

Small scale to hyperscale to webscale:

- Start at your size, and scale easily when you need
- One solution, almost any landscape configuration

Be readv

#### A LEADER IN THE FORRESTER WAVE™: DATA RESILIENCY SOLUTIONS Q3 2019

- Top-Ranked in Current Offering.
- Highest Scores in the Data Sources and Manageability criteria, and among the highest scores in the Backup Optimizations criterion.
- Highest Score Possible in the Security, Scalability, and Corporate Strategy criteria.

#### Cloud data protection projects can be progressive

Reduce costs and storage footprint while consolidating content

Archiving

• Cost effective solution for eDiscovery/compliance

COMMVAULT 🚯

- Eliminate content-specific point solutions
- Redeploy storage resources for higher value services

Reduce costs and risks with better air gap than tape

**Backup and recovery** 

storage target

• Modernize tape with a more

• Utilize "warm" and "cold"

"hot" is not required

your own

Be readv

flexible (and cheaper) solution

storage when more expensive

• Benefit from larger economies of

scale than you can achieve on

Reduce risk, simplify operations, and protect ROBOs

Cloud-based backup and recovery

- Unify backup and recovery across sites and Remote Offices/Branch Offices (ROBOs)
- Simplify your data management landscape to get a true "single pane of glass"
- Scale up as you need without large step-wise investments

Disaster Recovery failover/failback

- Automate and schedule Disaster Recovery operations to reduce risk while increasing productivity
- Implement "full-site Disaster Recovery" without investing in a full landscape
- Take advantage of new "failover/failback" options too difficult to do with your own resources

#### **Cloud-based Disaster Recovery can lead to other options**

Increase the value of your investment: use your data for more purposes

Automated orchestration enables you to take advantage of cloud **at your pace** 

Critical to have a "single view" across your combined landscapes

Be ready

- Migration doesn't have to be a bad word!
- Commvault backup technologies like archiving, IntelliSnap technology, and Live Sync reduce the risk, time, and cost required to start taking advantage of cloud

- True utopia is the ability to move back/forth
- As on-premises/cloud lines blur, multiple interfaces, several point solutions, and "scripting glue" become your **limiting factors**

#### How does the Commvault<sup>®</sup> Virtual Server Agent help?

- Hypervisor-level access and discovery across a wide range of hypervisors
- Native integration using standard toolsets and hypervisor API calls, to discover what to protect:
  - Which hosts make-up the hypervisor
  - What storage is associated
  - Which guests exist
  - How are guests configured

**C**-**D** Alibaba Cloud amazon webservices\*\* Google Cloud Platform Microsoft Azure **KVM** NUTANIX. ORACLE 🧠 redhat. Hyper-V **vm**ware<sup>®</sup> IBM Cloud XenServer **penstack** HUAWEI Add hypervisor @ Select vendor Click to select Search × Hostname / IP address Alibaba Cloud Hypervisor name Amazon Username Azure Stack Password Google Cloud Platform Microsoft Azure - Classic Microsoft Azure - Resource Manager

#### Putting it all together with your Commvault<sup>®</sup> implementation

#### Easily migrate VMs to a different hypervisor or cloud provider

Simplified conversion of VM from one hypervisor to another

- Leverages existing VM backups to migrate to a different hypervisor or cloud provider
- Simplifies the migration process to new technology

#### Flexible transformation between hypervisors and the cloud

#### **Cloud PaaS Protection**

\* Note: Items in italics are scheduled for release in the next two service packs

#### What Microsoft Office 365 data does Commvault protect?

Commvault Complete<sup>™</sup> Backup & Recovery

Protect Office 365 data

Store backup copy outside of Office 365

Recover data from accidental or intentional deletion, corruption, or malicious attacks

\*Globanet Merge1<sup>™</sup> technology required for Yammer<sup>™</sup> and Skype<sup>™</sup>

Protect, enhance and complete, your Microsoft 365 and Office 365 investment with the Commvault<sup>®</sup> Data Platform

#### Protect

- Protect data from deletion, corruption and attack
- Recover on-demand back into Office 365, onpremises or anywhere else
- Empower end users with self-service

#### Migrate

- Ensure data protection before during and after migrating
- Accelerate migrations by reducing the amount of data to be moved with integrated archiving
- Mobilize data based on business needs

#### Comply

- Keep secure backups of data, away from the production copy
- Perform eDiscovery search across all data, not just what's in Office 365
- Search across massive data sets in seconds, instead of minutes or hours

#### **Data protection for Office 365**

Comprehensive backup and recovery.

COMMVAULT<sup>®</sup>

Be ready

#### **DEPLOYMENT OPTIONS: ON-SITE ONLY**

COMMVAULT 🚯 Be ready

#### **DEPLOYMENT OPTIONS: HYBRID W/ AZURE**

#### Live sync and Live Sync direct

#### Live Sync / Live Sync Direct

- Replication of production VM to DR site
- Can be initiated after each backup or at a scheduled time

## Live Sync

Who should be cleaned out of our records?

Does the data still have an owner?

Decide where to store and secure data while adhering to governance needs

## Is there a link between IT and business?

Does the service level provided meet the service level delivered?

## The Next step: Classify, clean-up and sanitize

#### An opportunity for cost and risk reduction

Data and content analytics: primary outcomes

- Lower runaway cost and increase efficiency
- Legacy information clean-up
- System retirement and upgrades

Migration to cloud

- Mitigate corporate risk
- Compliance
- Sensitive data (PII/PCI/PHI) remediation

#### Record and content retention

## Storage optimization – Take action

## Immediately Identify High Risk Data & Act on It

#### Minimize risk by identifying sensitive data before it's a problem

## Access Management

#### Minimize risk by identifying access

- Who has Access?
- Filters per Machine
- Filters per user
- Update user permissions
- Audit trail

## Find Data and Respond to Requests

- Collect and index relevant fields from applications and files
- Use search for text, open text fields or structured fields
- Federate multiple sources in a single view
- Return fields that provide context

An opportunity to lower cost, increase efficiency and mitigate corporate risk

- Decision making is made easier when full context about the data is understood
- Context is metadata, and content and can be from multiple sources
- Visualization helps build stakeholder buy-in
- User role based visual applications can be built for ongoing management of cost and risk

# Thank you.
