Lessons from the field

Lessons From The Field (1/3)

Tenant Management

- E.g. companyX.onmicrosoft.com
- Playground Tenant example
- Not possible to change tenant name afterwards
- Implies move of all email, files, and any other data you want to keep to the new subscription
- Merger or split-off of tenants

License Assignment

- Assign correct licenses
  - F1/ E1 / E3 / E5
  - Not all users need all functionalities
  - Add-ons
- Cost Control
- Subscription Management (different licensing models)

Lessons From The Field (2/3)

Network Connectivity & Security

- Correct Bandwith
  - Migration Bandwith vs Production
  - Proxy
  - Used Services
- User Experience
- IAM & Access Control (MFA)

Backup

- Focus on what instead of how long
  - Usage of Retention Policies
- Microsoft standard backup vs external tools
  - 30 day self restore
  - Total 93 days
  - Granular Restore

Lessons From The Field (3/3)

Virtual Workplace (RDS / VDI)

- Examine need for RDS
- Shared Computer Activation
- Caching issues
  - Search Functionalities per system

SUMMARY

- Plan – Plan – Plan
- …

- Next Sessions
  - Veeam: O365 backup (availability platform for Hybrid Cloud)

  - Aruba: Ensure a safe and efficient connectivity

To get there, together
