

# For the enterprise

## Designed for Hybrid Work

### Key Benefits

The overall user interface is **modernized**, while **maintaining a familiar feel**.

A **deeper integration with collaboration and communication apps like Microsoft Teams**, enables **smarter collaboration**.

**Perfect for remote work**. Ship employees a corporate device secured by company policy and easily provisioned by them.

We are **deeply committed to app compatibility**. We stand behind our promise that your applications will work on Windows 11. **App Assure** we will fix any app issues you might run into at no additional cost.

**The most secure Windows yet**, with hardware-based integrity protection from the silicon to the cloud.

Use insights and analytics from cloud-management solutions to help you **deploy Windows 10 and Windows 11 side by side**.

## Powerful for employees. Consistent for IT. Secure for all.

The global pandemic accelerated digital transformation in ways never imagined. And as you continue that journey, we continue to invest in Windows for the new world of hybrid work and learning.

### Improve employee productivity and focus, with a simple, more powerful user experience.

Windows 11, reimagines Windows to deliver new flexible, intuitive, intelligent experiences that work how you work, teach, and learn. We know the end user experience is more important than ever before – not only for productivity, but for employee satisfaction, retention, and attracting new talent. With Windows 11, we are delivering a more streamlined, more human, powerful personal computing experience without compromising the performance, security, and manageability for which Windows is known.

### Discover a smarter way to collaborate with Microsoft Teams\*.

On-line meetings are prevalent for a hybrid workstyle. Windows 11 enables apps like Microsoft Teams to closely integrate with the user experience. People can share an open app from the taskbar when in a meeting or on a call. Inclusiveness is important in virtual meetings. Everyone can contribute an opinion now with an always available unmute button on the taskbar. And keep the background in the background by blurring it and applying noise cancelation.

### Protect data and secure access with a Zero Trust-ready operating system.

Security has never been more important. In the most complex cybersecurity environment we've ever seen, organizations need the next generation platform that evolves to address the changing threat landscape. Windows 11 provides a Zero Trust-ready operating system to protect data and access across devices.

### Make adoption easy with app compatibility and cloud management.

Consistency is what we have focused on for IT who need to deploy and support employees. They will find that many of the same technologies that they have been using on Windows 10 continue to work with Windows 11.
